PROJECTS

Weather Report

📅 06/2024 - 06/2024

- A responsive weather report website built using HTML, CSS, and JavaScript, hosted on Netlify. The website provides real-time weather updates by integrating with an external weather API. Features include location-based weather details, temperature, humidity, and a dynamic background that changes based on weather conditions.

Travel List

📅 09/2024 - 09/2024

- Developed a React-based travel list app with features to add, edit, delete, and sort items for efficient travel planning. Showcased skills in state management, React hooks, and dynamic UI design.

Ecommerce template

📅 10/2024 - 11/2024

- A fully functional and responsive e-commerce website built using HTML, CSS, and JavaScript. The website allows users to browse products, view detailed product descriptions, and add items to their cart. Designed with a clean and modern UI to ensure a seamless shopping experience.

Login Authentication

📅 09/2024 - 09/2024

- Java basically utilizes Login authentication using HashMap, with the basic logic of checking whether a username exists as a key and verifies the password against its corresponding value.
